                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          -08-459-415-1/c
Sequence 1, Application US/08459415
Sequence 1, Application US/08459415
Sequence 1, Application US/08459415
Patent No. 5744334
GENERAL INFORMATION:
APPLICANT DODIES, Michael S. and Mandaci, Sevnur
ATTLE OF INVENTION: Expression of Foreign for Directing the
TITLE OF INVENTION: Expression of Foreign Proteins to the Plant Epidermis
NUMBER OF SEQUENCES: 4
CORRESPONDENCE ADDRESS;
ADDRESSEE: Woodcock Washburn Kurtz Mackiewicz & No. 5744334ris
STREET: One Liberty Place 46th. Floor

/note="Organ: blood; Vector: Lambda ZAP II; Site 1: ECORI; Site 2: ECORI; 65,000 proliferating erythroid cells from Site 2: ECORI; 65,000 proliferating erythroid cells from the Duffy coat of a blood donation were obtained by flow cytometric separation after a 5-day culture period in the presence of erythroboietin. Total RNA was purified from the sorted cell population using TRIZOI reagent. RNA (0.3 ug) was converted into double stranded cDNA using Clontech's CapRinder cDNA Library Construction Kit (Clontech) according to the manufacturer's protocol and cloned into EcoRI digested lambda Zap II vector (Stratagne). The phage library was amplified once prior to in vivo excision in Solk cells. Individual colonies were grown, and the cDNA inserts were sequenced in high throughput (NIH intramural sequencing center
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Logards Jeffery L.
